Agenda

- 1. Where do good product change ideas come from?
- 2. Enterprise Integration: Leveraging SAP's super power
- 3. Product Data Collaboration without Boundaries
- 4. SAP Enterprise Product Development for crossfunctional collaboration, Presentation by Gramont
- 5. SAP Enterprise Product Development Strategic Roadmap

01 Where do good product change ideas come from?

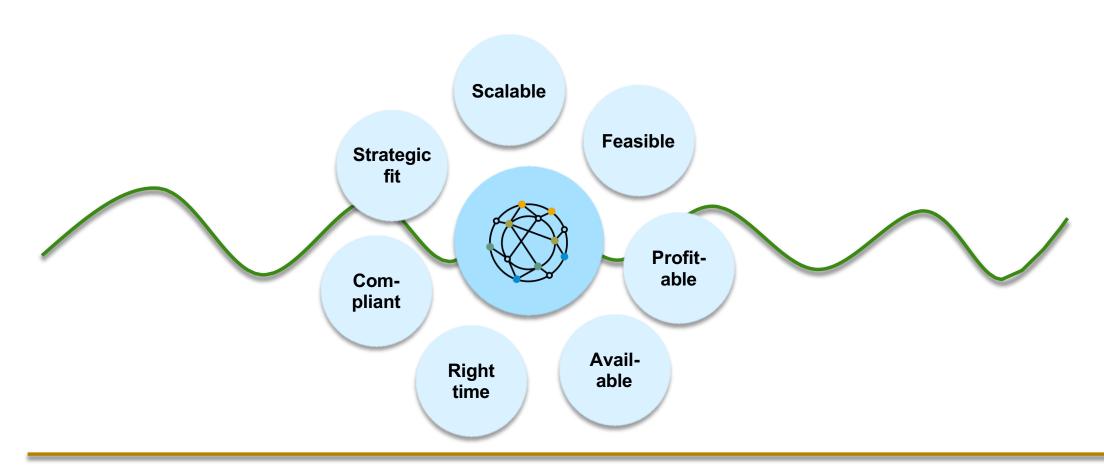

Ing-Marie Lönnerheden SAP

Atilla Madarász SAP

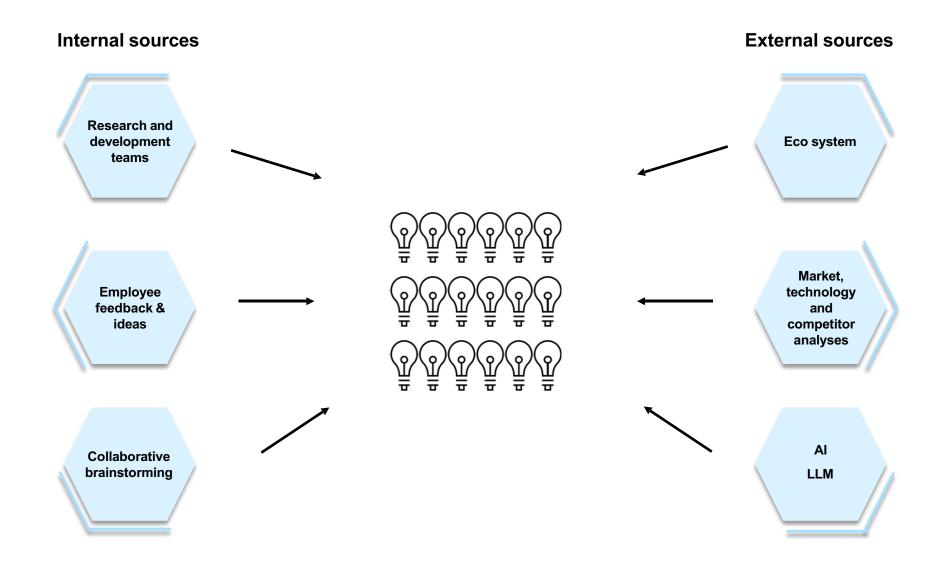

- What are good product change ideas and where can they be found?
- How can we identify the best ideas to pursue?
- How can we ensure a holistic and rapid change process?

What is a great product change idea?

Solves a problem in a great way for the end users

What are good sources for ideas?

Change Process

Our vision on change management

02 Enterprise Integration: Leveraging SAP's super power

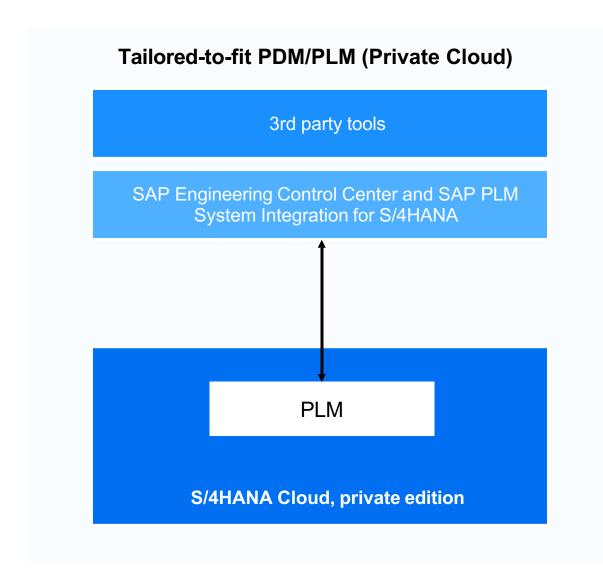

Gerhard Himmelsbach SAP

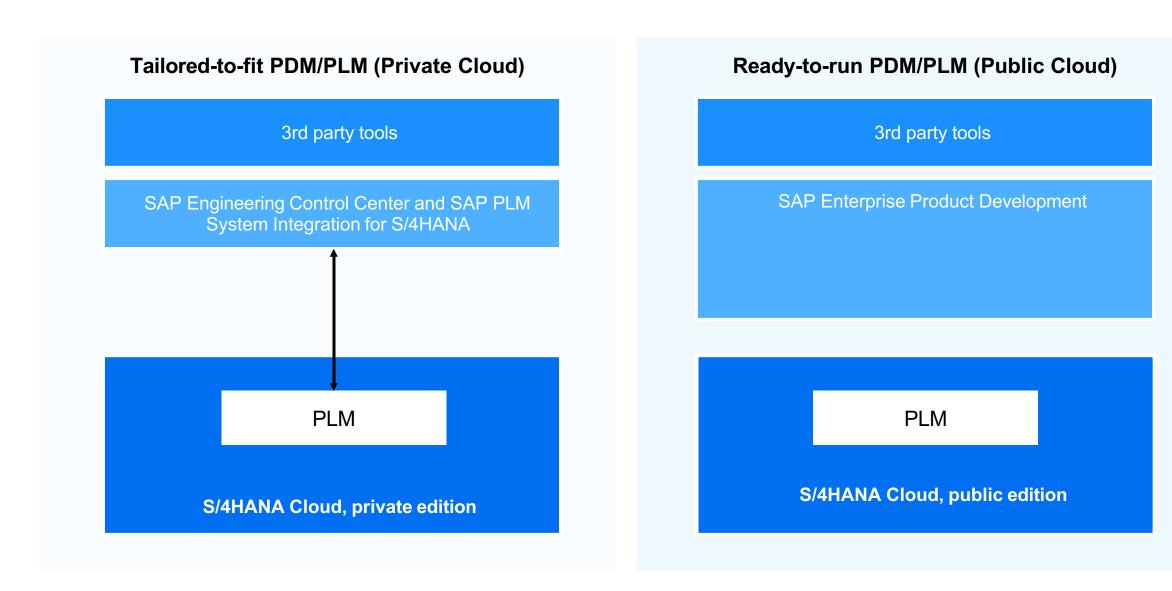

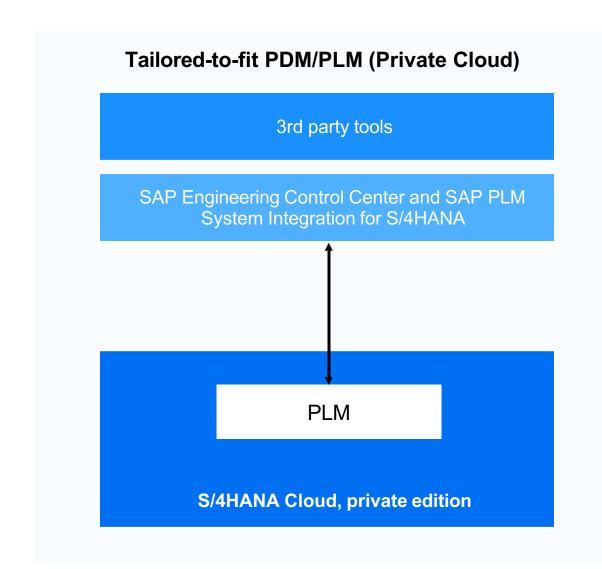

Nick Wang SAP

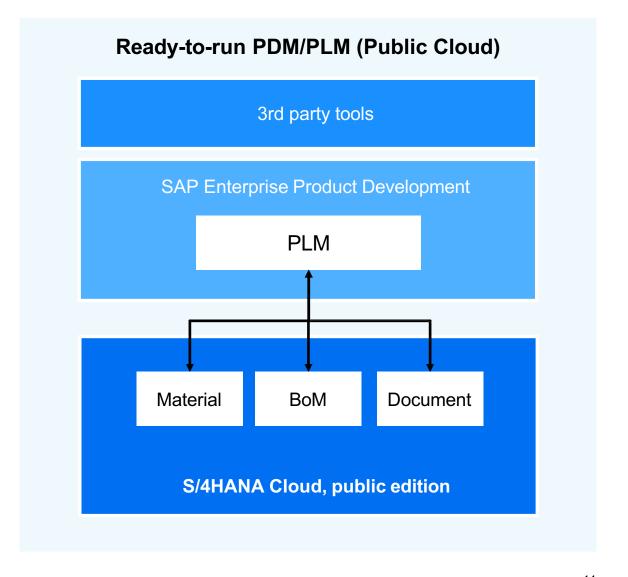

- What does the SAP PLM Portfolio for different industries look like?
- Why is Visualization Important to Manufacturers and Asset Operators?

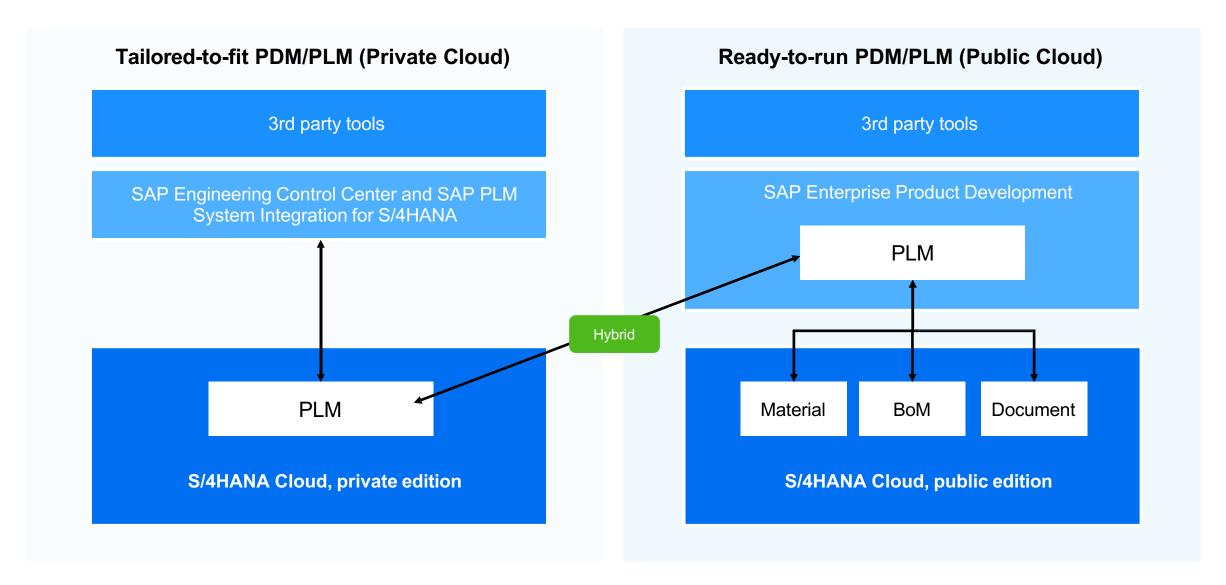

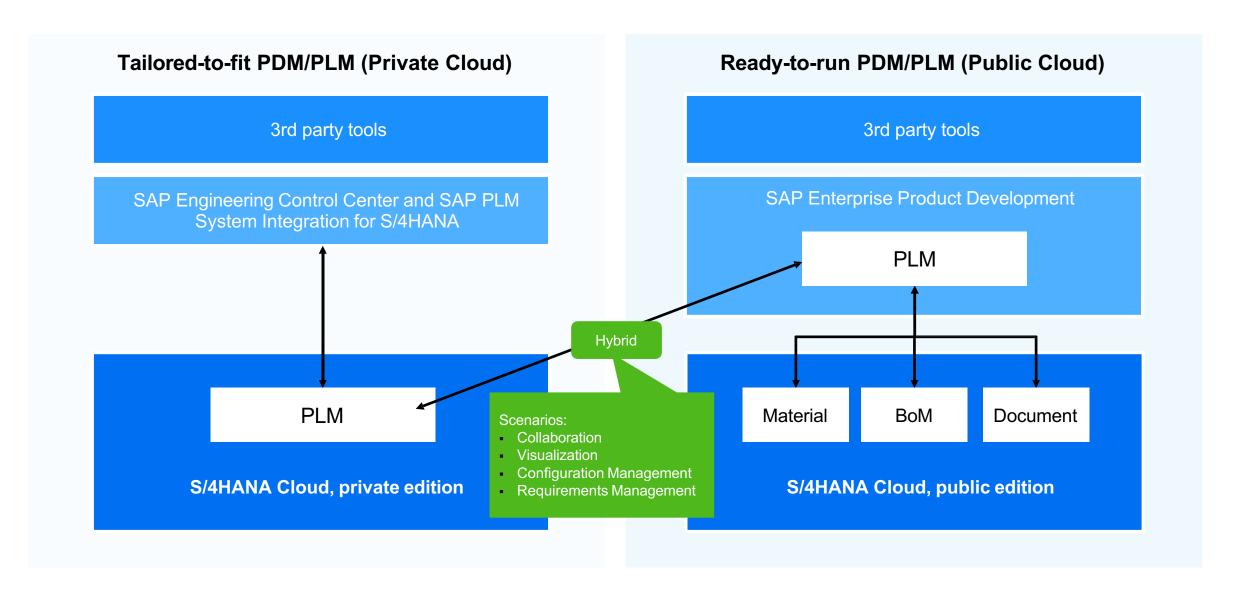

Ready-to-run Cloud PDM/PLM (Public Cloud)

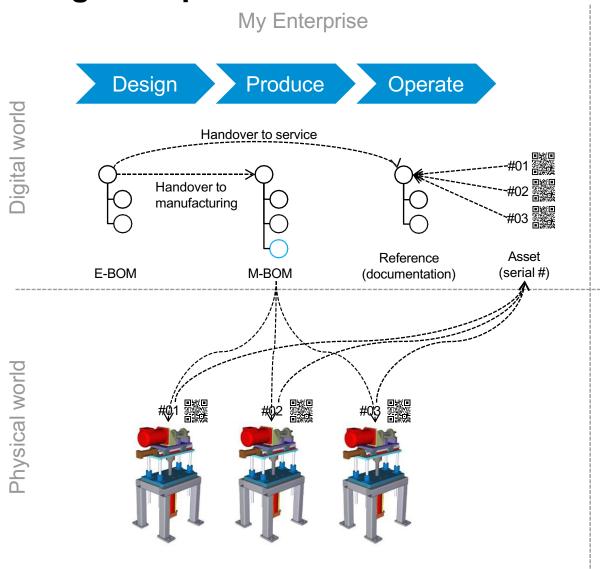

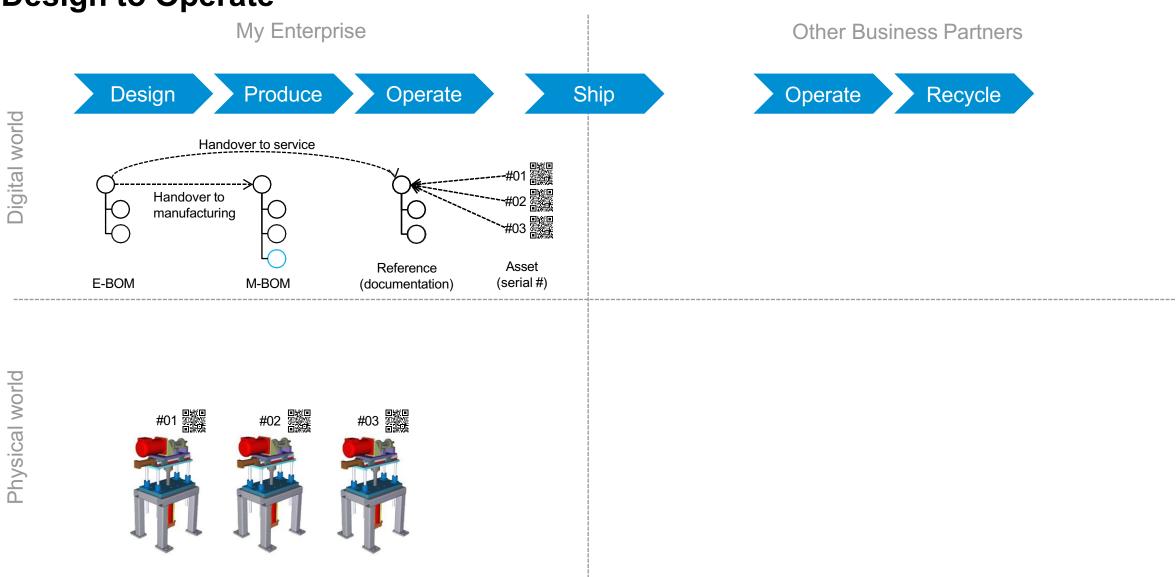

Design to Operate

Other Business Partners

Design to Operate

Why is Visualization Important to Manufacturers and Asset Operators?

Change and Complexity in our Products & Assets...

Smart Products

Products with embedded systems and/or software are getting more complex

Connected

Everything and everyone is connected

People Expertise

Domain knowledge requires product & asset contextual information

Processes

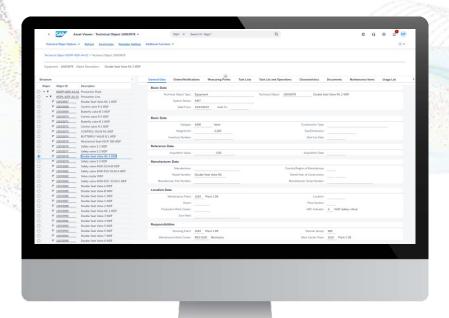

Siloed data and thinking does not work, change management is continues

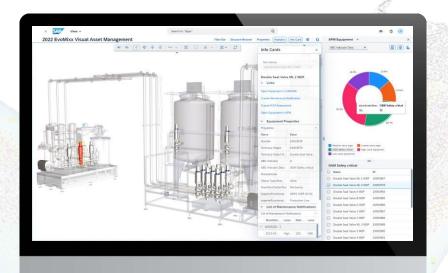

Modern day workforce, demand a modern-day user experience

We can't go on like we did in the past to manage this complexity...

We need a paradigm shift on the way we access, deliver and execute enterprise data....

- Product Design
- Collaboration & Sourcing
- Product Compliance
- Manufacturing & Quality
- Work Instructions
- Asset Management & Service
- Spares Parts

O3 Product Data Collaboration without Boundaries

Mark Landrosh SAP

Manoj Kaippilly SAP

How can cross-departmental collaboration can lead to an emergence of great collective intelligence for the enterprise?

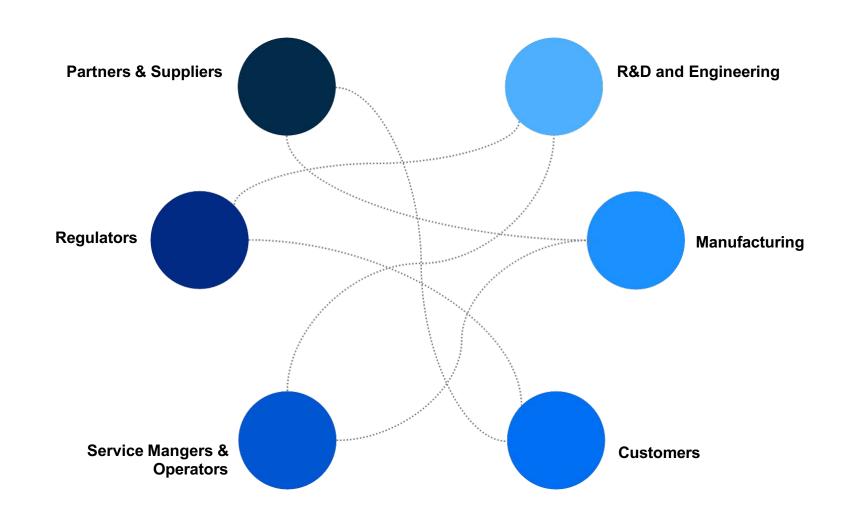

Today's challenges in PLM

Challenges

- Increasing product complexity
- Heterogenous systems landscapes
- Supply chain disruptions

Implications

- Increase time-to-market
- Increasing R&D spend
- Reduced ability to Innovate

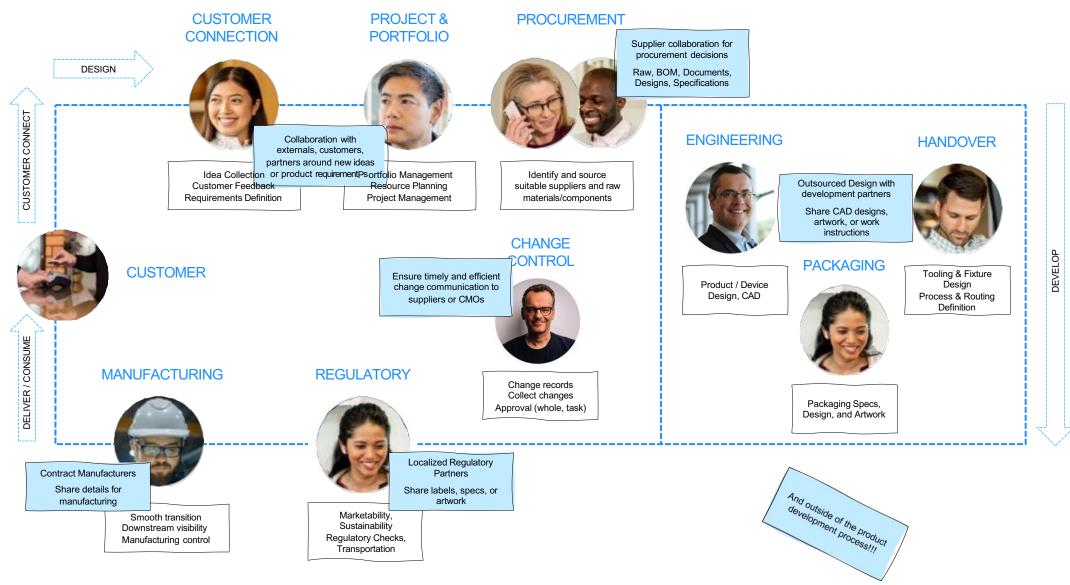

Harnessing Collective Intelligence:

Collaborative Edge using EPD

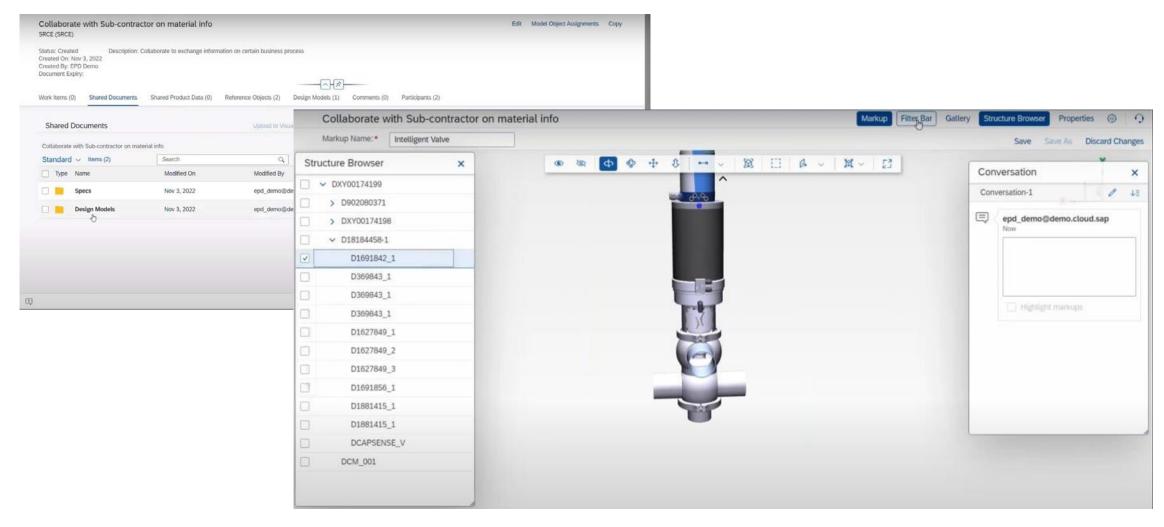

Collaboration drives innovation, efficiency, compliance, and optimized manufacturing in product development

Streamlining Collaboration in the Product Development Process

Demo: Supplier Collaboration

Accelerating Digital Transformation

with SAP Enterprise Product Development (EPD)

COMPANY

Leading Automobile manufacturing based out of Europe is the world's leading manufacturer of premium automobiles and motorcycles. The company has 31 production and assembly facilities in 15 countries and a global sales network

USE CASES & OBJECTIVE

Customer leverages EPD collaboration as replacement for cFolders to ensure timely availability of the **invoices** to customers and carriers for **custom clearance of shipments**.

- Solution to integrate and streamline product and data exchange across extended enterprise
- Customer adopted SAP EPD to benefit 300+ users globally for collaborations and sharing documents seamlessly with customers and carriers

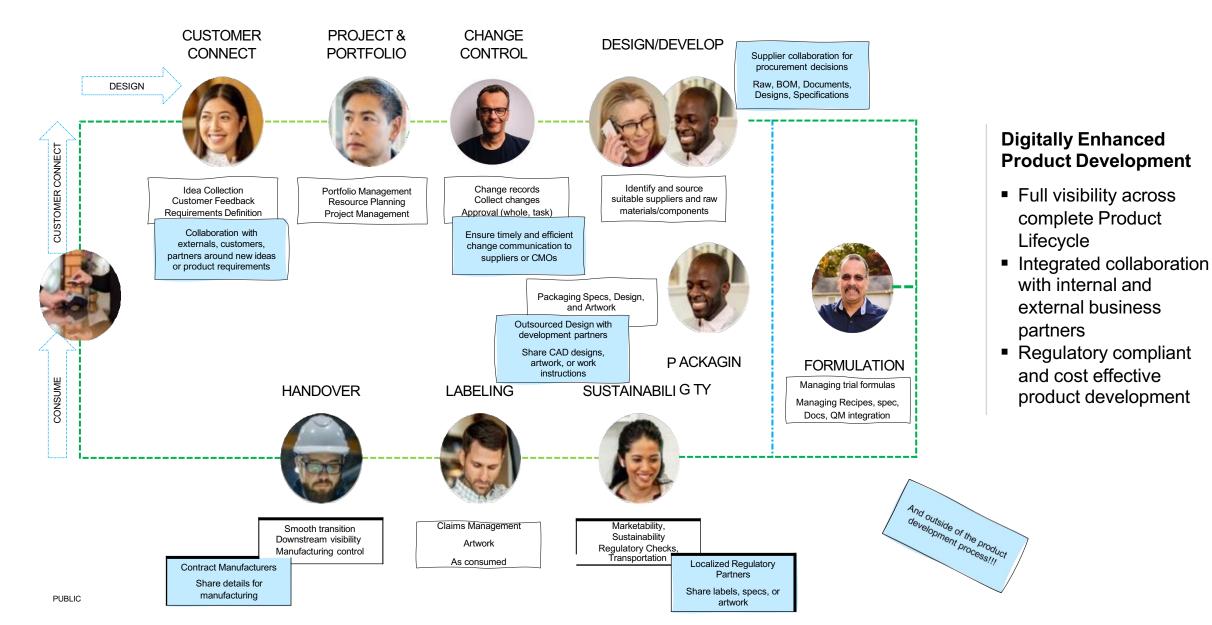

WHY SAP?

- Multi factor authentication enabled for secure document access for customer and its users
- Custom attributes such as search/sort/filter provided ease of document access for users
- ✓ Better control mechanism for managing users access for internal and external users
- Compliance without human intervention for documents: "Auto deletion after retention time"
- ✓ Simple browser-based FIORI UI, supporting mobile clients
- Clients/Business owners can subscribe for email notification for specific folders

Collaboration

Streamlining Collaboration in the Product Formulation Process

Developing the right product across the extended enterprise with SAP Enterprise Product Development

COMPANY

Global food company headquartered in Europe, that is one of the world's largest exporters of organic meat. As a cooperative they have an obligation to receive the livestock that their cooperative members supply. The company sells fresh and processed meat via their various brands along with a series of byproducts to customers in 130+ countries and went live with SAP EPD collaboration in May 2023.

USE CASES

- Collaborate with suppliers on documents and contracts in a process driven way to streamline information exchange
- Collaborate with suppliers on specifications for processed meats and byproducts, ensuring regulatory compliance, and maintaining a single source of truth

WHY SAP?

In line with their ambition to continually strive to improve their farm to fork process. SAP is an essential strategic component of the customer's future digital platform, that will enable them to achieve:

- Faster time to market
- More sustainable services and products for their end consumers
- Improved customer satisfaction

Featured Solutions and Services

SAP Enterprise Product Development (EPD): Collaboration and Specification

Harnessing Collective Intelligence: Collaborative Edge using EPD

Supplier Collocation

- Optimize supply chain to ensure time delivery of materials and minimize production delays.
- Foster Innovation Enable access to specialized knowledge and valuable insights
- Support sustainability efforts work hand-in-hand with suppliers to ensure adherence to **ethical** and environmental standards, driving **responsible** sourcing and production **practices**

BOM Collaboration

- Accurate and Aligned Production ensures that both the primary manufacturer and co-manufacturer have a synchronized understanding of the required components, quantities, and assembly processes
- Facilitate real-time communication between manufacturers and co-manufacturers.
- ensures that both parties are aware of and adhere to regulatory requirements for ingredients, labeling, and manufacturing processes

Design Collaboration

- Enable stakeholders to visualize and interact with designs in a realistic digital environment
- Red lining design documents with feedback, suggestions, or changes to facilitate collaborative revisions
- Aligns packaging aesthetics with brand identity, ensuring consistency across product lines

Document Collaboration

- Ensures regulatory compliance by providing a comprehensive record of processes, materials, and actions, facilitating transparency and accountability in adherence to legal and industry standards
- **Documents** such as Certificates of Analysis (COA), Safety Data Sheets (SDS), and quality test results can be collaboratively managed to ensure **accuracy**, consistency, and regulatory **compliance** throughout the product lifecycle

O5 SAP Enterprise Product Development Strategic Roadmap

Carsten Dietze-Selent SAP

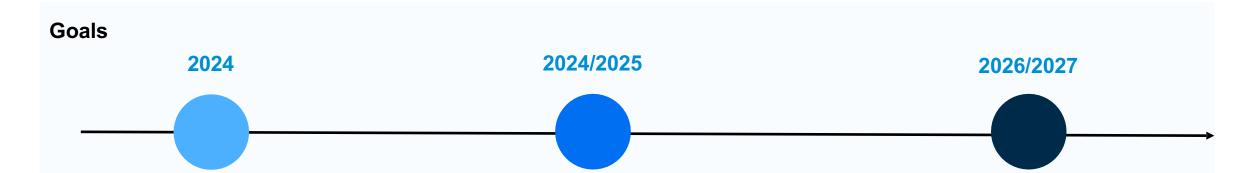

- Product Goals
- Roadmap highlights

Ismail Serin

Summary

SAP Enterprise Product Development: Long-term Product Goals

Enterprise PLM in the Cloud

- Provide a modern PLM process for Discrete and Process Industries
- Fast access to new innovations based on the Digital Thread
- Expand integrations with S/4HANA and SAP Digital Supply Chain

Al-enabled PLM

- Expand AI scenarios and infuse it into core PLM process steps
- Reduce manual and repeatable user tasks
- Leverage knowledge graphs for product mining scenarios

Network-aware PLM

- Continuously evolve the suite and expand integrations scenarios
- Enable organizations to establish
 KPI-driven PLM processes
- Expand collaboration and business network scenarios

Enablers

PLM as a platform for partners

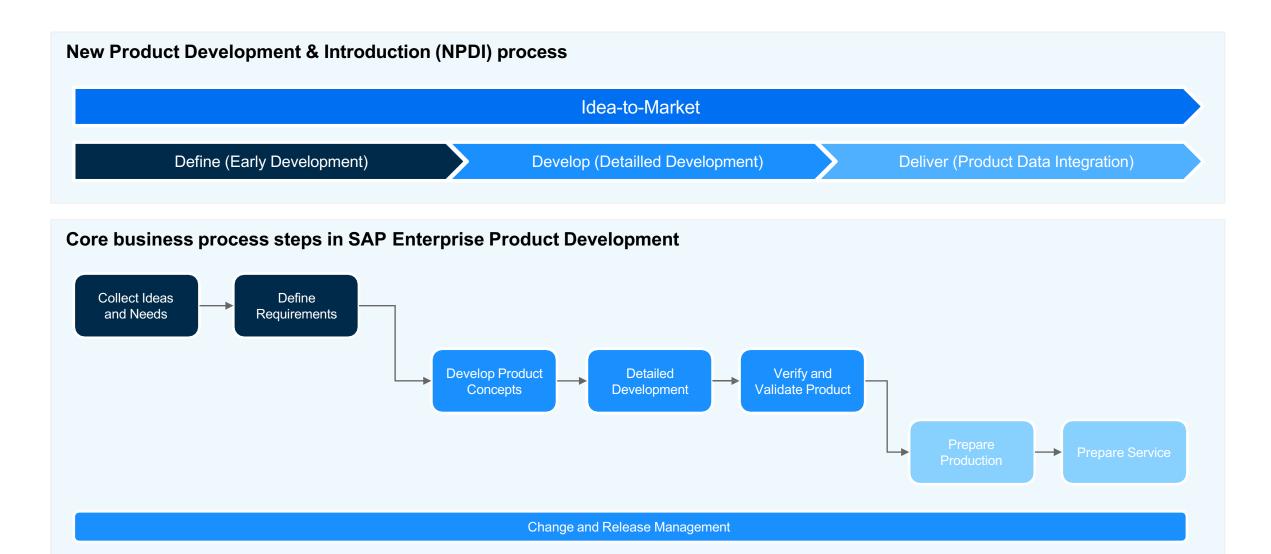

Continuous Feature Delivery (CFD)

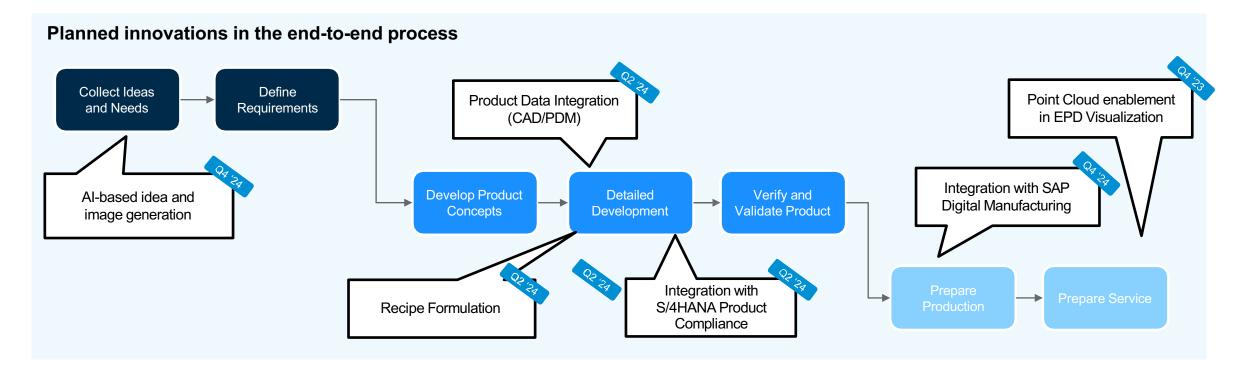

Simple and fast Adoption

SAP Enterprise Product Development

Summary

SAP Enterprise Product Development enables product centric organizations to define, develop, and deliver innovative and sustainable products

OBJECTIVE

Provide end-to-end business processes to manage product data for standard and configurable products.

CAPABILITIES

- Innovation & Requirements Management
- Systems Engineering
- Product Data Management
- Collaboration
- Intelligent Handover
- Visualization
- Insights (Analytics & Reporting)

INTEGRATIONS

- S/4HANA Cloud, public and private edition
- SAP Digital Manufacturing
- SAP Asset Performance Management

BENEFITS

Grow market share
Listen to the voice of customer and
drive data-driven product
improvement decisions.

Shorten time-to-market

Coordinate multi disciplinary teams and heterogenous systems to improve operational efficiencies.

Reduce cost

Leverage workflows, collaborations and new technologies (e.g. AI) to reduce redundant work.

Ensure compliance, quality and sustainability

Integrate product data with expert systems to ensure all product requirements are fulfilled.

Thank you:)
